

**Press release IMTS 2008**

## **solid quality for high performance tools up to 20 mm**

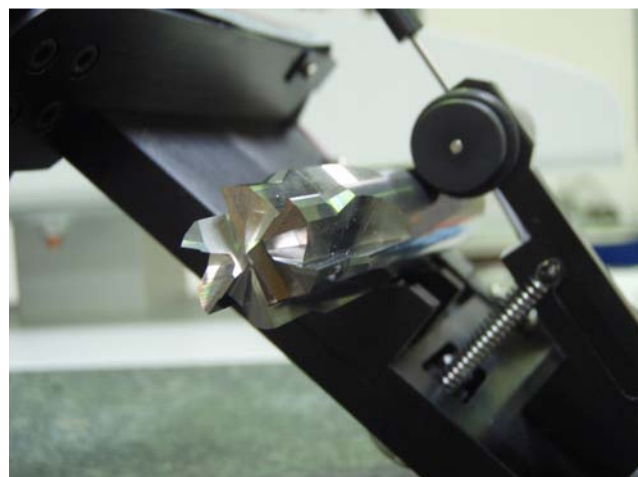

**mt microtool has launched the „nanomatic“ measuring system at the EMO 07. A motorised tool measuring system, simple to use, with an accuracy to meet demands from a new generation of tool grinding systems.**

**Operator friendly software for drills, mills and now also step tools run on all our machines, providing complete solutions which are already in daily use at many of the world’s leading tool companies.**

**Our customers like the simplicity and speed of the “nanomatic” and now want to use it for larger tools.**

**A new rotary V-block offers solid quality control for tools up to 20 mm in any position. Manual machines can also easily be upgraded.**

**IMTS 2008 Chicago – Booth B-7229**
